1. Report No. DOT/FAA/ASC-93-1	2. Government Accession No.	3. Recipient's Catalog No.	
4. Title and Subtitle 1993 Aviation System Capacity Plan		5. Report Date	
		6. Performing Organization Code ASC-1	
7. Author(s)		8. Performing Organization Report No.	
9. Performing Organization Name and Address MITRE Corporation, McLean, VA Transportation Systems Center, Cambridge, MA MiTech Incorporated, Rockville, MD JIL Systems, Arlington, VA		10. Work Unit No. (TRAIS)	
		11. Contract or Grant No.	
12. Sponsoring Agency Name and Address U.S. Department of Transportation Federal Aviation Administration Office of System Capacity and Requirements Washington, DC 21591		13. Type of Report and Period Covered	
		14. Sponsoring Agency Code ASC-1	
15. Supplementary Notes This report resulted from a collaborative effort by the Office of System Capacity and Requirements, other FAA organizations, the MITRE Corporation, the Transportation Systems Center, MiTech Incorporated, and JIL Systems.			
16. Abstract A comprehensive review of the Federal Aviation Administration's program to improve the capacity of the National Air Transportation System. The Plan identifies the causes and extent of capacity and delay problems currently associated with air travel in the U.S. and outlines various planned and ongoing FAA projects that will reduce the severity of the problems in the future. The major areas of discussion are: 1) Airport Development 2) Airport and Airspace Capacity 3) Technology for Capacity Improvement 4) Marketplace Solutions			
17. Key Words Civil Aviation Airport Capacity Aviation Capacity Aviation Delay Reduction		18. Distribution Statement Document is available to the public through the National Technical Information Service Springfield, VA 22161	
19. Security Classif. (of this report) UNCLASSIFIED	20. Security Classif. (of this page) UNCLASSIFIED	21. No. of Pages 376	22. Price

Table of Contents

Chapter 1—Introduction

1.1	The Need for Aviation System Capacity Improvement	1-1
1.2	Aviation System Capacity Plan	1-2
1.3	Level of Aviation Activity	1-3
1.3.1	Activity Statistics at Top 100 Airports	1-4
1.3.2	Traffic Volumes in Air Route Traffic Control Centers (ARTCCs)	1-4
1.4	Delay	1-14
1.4.1	Sources of Delay Data	1-14
1.4.2	Delay by Cause	1-14
1.4.3	Delay by Phase of Flight	1-17
1.4.4	Identification of Delay-Problem Airports	1-19
1.4.5	Identification of Forecast Delay-Problem Airports	1-19

Chapter 2—Airport Development

2.1	Delay and the Need for Airport Development	2-1
2.2	New Airport Development	2-2
2.3	Development of Existing Airports — Airport Capacity Design Teams	2-4
2.3.1	Airport Capacity Design Teams — Recommended Improvements	2-8
2.3.2	Airport Capacity Design Teams — Potential Savings Benefits	2-11
2.4	Construction of New and Extended Runways.....	2-13

Chapter 3—New Instrument Approach Procedures

3.1	Wake Vortex Restrictions.....	3-2
3.2	Improved Longitudinal Separation on Wet Runways	3-3
3.3	Parallel Instrument Approaches	3-4
3.3.1	Independent Parallel Instrument Approaches Using Current Radar Systems	3-4
3.3.2	Independent Parallel Instrument Approaches Using a Precision Runway Monitor	3-5
3.3.3	Independent Parallel Instrument Approaches Using Final Monitor Aid (FMA)	3-7
3.3.4	Dependent Parallel Instrument Approaches.....	3-7
3.4	Converging Approaches	3-8
3.4.1	Independent Converging Instrument Approaches.....	3-9
3.4.2	Dependent Converging Instrument Approaches	3-10
3.4.3	Simultaneous Operations on Intersecting Runways (SOIR)	3-12
3.5	Simultaneous ILS and LDA Approaches	3-12
3.6	Flight Management System (FMS) Transition to Existing Approaches	3-13
3.7	Independent and Dependent Approaches for Multiple Parallel Runways	3-13
3.8	Approach Procedure Applicability at the Top 100 Airports.....	3-14

Chapter 4—Airspace Development

4.1	Kansas City Area Airspace Project	4-3
4.1.1	St. Louis TRACON Operational Alternatives	4-3
4.1.2	Kansas City TRACON Operational Alternatives	4-4

4.1.3 Kansas City En Route Airspace Alternatives.....	4-5
4.2 Houston/Austin Airspace Project	4-5
4.2.1 New Austin Airport/Airspace System	4-6
4.2.2 East Coast Traffic Rerouting Option.....	4-7
4.3 Oakland Airspace Project	4-8
4.3.1 Sector 11 Initiative	4-9
4.3.2 Northern California Combined Radar Facility (NORCAL CRF) Airspace Redesign	4-10
4.3.3 Sacramento Airspace Routings Analysis	4-11
4.3.4 Fallon Special Use Airspace Impact Analysis.....	4-11
4.4 Dallas-Fort Worth Metroplex Project.....	4-12
4.4.1 New Airspace Design for the DFW Area	4-12
4.4.2 New Runway Capacity at DFW Airport	4-13
4.4.3 Airspace Interactions between DFW Airport and Satellite Airport Traffic.....	4-14
4.5 Expanded East Coast Plan	4-14
4.5.1 Current Operations	4-15
4.5.2 Proposed Operations	4-16
4.6 New Denver Airport/Airspace Study	4-17
4.6.1 Terminal Airspace Design Evaluation.....	4-18
4.6.2 Runway Use Analysis	4-18
4.6.3 New Denver Airport and Terminal Airspace Capacity Analysis	4-19
4.7 Los Angeles Airspace Project.....	4-20
4.7.1 Los Angeles International Airport Capacity Analysis	4-20
4.7.2 Airspace Choke Point Delay Analysis.....	4-21
4.7.3 Los Angeles Basin Airspace Realignment Analysis	4-22
4.8 Chicago Airspace Project	4-23
4.8.1 Baseline Operations.....	4-23
4.8.2 Short-Term Operational Alternatives	4-24
4.8.3 Long-Term Operational Alternatives	4-25
4.9 Studies in Progress	4-27

Chapter 5—Technology for Capacity Improvement

5.1 Airport Surface Capacity Technology	5-1
5.1.1 Airport Surface Traffic Automation Program.....	5-2
5.2 Terminal Airspace Capacity Technology.....	5-3
5.2.1 Terminal ATC Automation (TATCA)	5-3
5.2.1.1 Converging Runway Display Aid	5-3
5.2.1.2 Center-TRACON Automation System	5-4
5.2.2 Precision Runway Monitor (PRM)	5-5
5.2.3 Microwave Landing System (MLS)	5-6
5.2.4 Traffic Alert and Collision Avoidance System (TCAS) Applications	5-7
5.2.5 Wake Vortex Avoidance/Advisory System (WVAS)	5-8
5.3 En Route Airspace Capacity Technology.....	5-8
5.3.1 Advanced Traffic Management System (ATMS)	5-9
5.3.2 Automated En Route Air Traffic Control (AERA)	5-10

5.3.3	Automatic Dependent Surveillance (ADS) and Oceanic ATC	5-11
5.3.4	Communications, Navigation, and Surveillance	5-12
5.3.4.1	Aeronautical Data Link Communications	5-12
5.3.4.2	Satellite Navigation	5-13
5.3.4.3	Terminal Area Surveillance System	5-13
5.3.5	Aviation Weather	5-14
5.4	System Planning, Integration, and Control Technology	5-15
5.4.1	National Simulation Capability	5-15
5.4.2	Analysis Tools	5-16
5.4.2.1	Airport Network Simulation Model (AIRNET)	5-16
5.4.2.2	Airport and Airspace Simulation Model (SIMMOD)	5-16
5.4.2.3	Airfield Delay Simulation Model and Runway Delay Simulation Model.....	5-17
5.4.2.4	The Airport Machine	5-17
5.4.2.5	National Airspace System Performance Analysis Capability (NASPAC)	5-17
5.4.2.6	Sector Design Analysis Tool (SDAT)	5-18
5.4.2.7	Terminal Airspace Visualization Tool (TAVT)	5-18
5.4.2.8	Graphical Airspace Design Environment (GRADE)	5-19
5.4.3	National Control Facility (NCF)	5-20
5.4.4	Traffic Flow Planning.....	5-21

Chapter 6—Marketplace Solutions

6.1	New Hubs at Existing Airports	6-1
6.2	Expanded Use of Existing Commercial Service Airports	6-4
6.3	Expanded Use of Reliever Airports	6-4
6.4	Civilian Use of Military Airfield Capacity.....	6-5

Chapter 7—Summary

Summary	7-1
---------------	-----

Appendix A	Activity Statistics at the Top 100 Airports	A-1
Appendix B	Airport Layout Directory of the Top 100 Airports	B-1
Appendix C	Airport Capacity Design Team Project Summaries	C-1
Appendix D	New Runway Construction Projects at Major U.S. Airports.....	D-1
Appendix E	Layouts of the Remaining Top 100 Airports.....	E-1
Appendix F	Airport Capacity Design Teams Potential Savings from Recommended Airfield Improvements	F-1
Appendix G	New Technology for Improving System Capacity	G-1
Appendix H	List of Abbreviations.....	H-1
Appendix I	Index	I-1

List of Tables

Table 1-1.	Rate of Decline by User Group in Traffic Handled by Air Route Traffic Control Centers FY90 to FY91	1-9
Table 1-2.	Projected Annual Growth Rate by User Group in Traffic Handled by Air Route Traffic Control Centers FY90 to FY05	1-11
Table 1-3.	Distribution of Delay Greater than 15 Minutes by Cause.....	1-15
Table 1-4.	Percent of Operations Delayed.....	1-17
Table 1-5.	Average Delay by Phase of Flight.....	1-18
Table 1-6.	Percentage of Operations Delayed 15 Minutes or More	1-20
Table 1-7.	1991 Actual and 2002 Forecast Air Carrier Delay Hours	1-21
Table 2-1.	Major New Airports — Under Construction and Planning Studies	2-3
Table 2-2.	Status of Airport Capacity Design Teams	2-5
Table 2-3.	Summary of Capacity Design Team Recommendations	2-10
Table 2-4.	Potential Savings from Airfield Improvements Recommended by Airport Capacity Design Teams	2-12
Table 2-5.	New and Extended Runways Planned or Proposed.....	2-16
Table 3-1.	Candidate Airports for Independent Parallel Approaches Using the Precision Runway Monitor (PRM)	3-6
Table 3-2.	Candidate Airports for Dependent Approaches Using the Converging Runway Display Aid (CRDA)	3-11
Table 3-3.	Potential Siting of New IFR Approach Procedures and Their Associated IFR Arrival Capacity	3-16
Table 4-1.	Summary of Airspace Improvement Alternatives Analyzed.	4-2
Table 6-1.	A Preliminary List of Airports Located Near the 23 Delay-Problem Airports	6-7

List of Figures

Figure 1-1.	The Top 100 Airports by 1991 Enplanements	1-5
Figure 1-2.	The 20 Continental U.S. Air Route Traffic Control Centers	1-6
Figure 1-3.	Operations at Air Route Traffic Control Centers	1-7
Figure 1-4.	Air Route Traffic Control Center Forecasts.....	1-8
Figure 1-5.	Traffic Handled by ARTCCs, FY90 and FY91	1-10
Figure 1-6.	Traffic Handled by ARTCCs, FY91 and Forecast FY05	1-12
Figure 1-7.	Primary Cause of Delay of 15 Minutes or More in FY90 and FY91	1-16
Figure 1-8.	Delays Per 1,000 Operations	1-22
Figure 1-9.	Airports Exceeding 20,000 Hours of Annual Delay in 1991	1-23
Figure 1-10.	Airports Forecast to Exceed 20,000 Hours of Annual Aircraft Delay in 2002, Assuming No Capacity Improvements	1-24
Figure 2-1.	Airport Capacity Design Teams in the U.S.	2-6
Figure 2-2.	Airport Capacity Design Team — Three Year Plan	2-7
Figure 2-3.	New Runways Planned or Proposed Among the Top 100 Airports	2-14
Figure 2-4.	New Runways or Extensions Planned/Proposed Among the Top 100 Airports Forecast to Exceed 20,000 Hours of Annual Aircraft Delay in 2002	2-15
Figure 6-1.	Total Delay for Varying Arrival Demand at San Francisco	6-3
Figure 6-2.	Capacity Delay Curve for San Francisco Assuming a New Connecting Hub at Sacramento.....	6-3
